## About the FSMC Enhanced Geriatric Care Management Program

Family Service Geriatric Care Managers are professionals who assist elders and their families with long-term care issues. We can help with one aspect of your loved one's needs or take responsibility for setting up every facet of care. The FSMC Geriatric Care Manager acts as a counsel and advocate – identifying problems and offering solutions, from assessment of an aging parent's needs to addressing the life changes of a family affected by Alzheimer's Disease, Parkinson's or other chronic illnesses. Based on expertise that comes only with years of experience, we will guide you through the complex maze of long-term care services and providers.

The FSMC Enhanced Geriatric Care Management program is staffed by professionals who provide private consultation and follow-up on a fee-for-service basis. This care is *enhanced* by the added resources of an entire FSMC senior services team, including credentialed elder-care professionals with decades of aggregate experience in serving the senior population. Through our strong community connections, we can expedite appropriate delivery of care and often reduce or eliminate unnecessary expenses.

FSMC will work with you to improve the independence of your elderly loved one and ensure the highest attainable quality of life.
